

# Sharp Protein Markers III

## Recommended storage conditions:

-20 °C for one year

Avoid multiple freeze/thaw cycles

**Loading volume:** Mini gel / blotting: 5 µl/well  
Large gel / blotting: 10 µl/well

**Size range:** 10~315 kDa

**Fragments:** 12 proteins

**Package size:** 500 µl\*1 vial

- The 72 kDa and 315 kDa reference bands are orange.
- The 52 kDa and 10 kDa reference bands are green.
- The protein marker is supplied in gel loading buffer and is ready-to-use. **DO NOT BOIL**, further dilution or addition of any reducing agent.
- After running the gel, stain the gel or perform Western blot transfer as desired.
